A. REICH, Proprietor.

214 PEARL STEET, NEW YORK.

Three Prize Medals, 1869, '70, '71.

LARD.

The market for Western has been rather dull during the past week, and prices have ruled easy on spot lots all the week. At the opening on Tuesday, holders were offering at 10⅝c. with an easier tone noticeable, closing on Monday at 10½c, with a small demand at this figure. City has also ruled quiet, in sympathy with Western, and opening at 10½ has ruled easy until the close on Monday, when holders were offering at 10⅜c, with 10¼c bid. Stearine has been dull and irregular with no disposition shown to operate; prices are quoted at 11⅛@11¾c.

—:o:—

TALLOW.

There has been a small demand through the week and prices are rather easy, opening at 8⅝@8¾ for prime lots, and holders are now quoting 8½@8⅝c, with only a small trade at these figures. Sales foot up about 500,000 lbs.

—.o:—

PETROLEUM.

The market continues rather quiet but prices rule steady Refined opened on Tuesday at 26, and this figure has been the ruling quotation all the week, buyers not showing any disposition to take hold at this figure. Crude has become quiet but steady and is held at 13½ for bulk, and 17½ for shipping order. Cases have been quiet, but holders are firm at 30@31c. Naphtha is firmly held at 14c.

—:o:—

NAVAL STORES.

The market during the past week has been fairly busy for most descriptions, and prices rule easier. Spirits of turpentine have sold in fair parcels, with holders asking 33½@34 at the opening on Tuesday, and has ruled steady until Monday, when prices were firmer, and 34¾@35c were the quoted figures. Rosins have sold in round lots at firmer figures, for strained, $1 90@2 00 being asked at the close; finer grades steady. Tar is jobbing at $2 12½@2 25 as to quality. Pitch is held at $2@2 12½, with mail lots moving.

GEORGE SOANES, SON & CO.'S MARKET REPORT.

LONDON, September 28th, 1876.

Linseed.—6,069 quarters report into London during the week,—5,558 from Calcutta, 351 from Cephalonia, and the remainder from Harlingen and Palermo. The market continues steady for spot Calcutta at 51s, at which a few sales have been made; parcels shortly due have changed hands at 50s 6d@51s, and September-November shipments have been sold at 50s 3d. For Cephalonian Seed of good quality 52s has been paid ex warehouse. Bombay for shipment up to the end of the year by sailing vessels to Hull has made 52s@52s 3d, and for shipment during the spring by steamers to the same port 51s 9d. Azov about loaded or loading by steamers offers at 52s U.K.: no business however is reported in this description.

Rapeseed.—Prices have been well maintained. Brown Calcutta on the spot has been sold at 56s for fair quality, and at 56s 6d for fine; to arrive 57s would be given for good parcels. Guzerat on the spot has made 65s, November-December despatch 58s c. f. and i., and business is reported in March-May shipment by steamer at 61s. Good Yellow mixed Calcutta on the way has found buyers at 62s@63s. Ferozepore we quote 55s@55s 6d spot and to arrive. Poppy seed near at hand is worth 47s 6d@47s 9d, and September-October B L 47s@47s 3d. Niger seed 38s 6d@39s.

Cotton seed has been neglected on the spot, the coast cargo named last week has made £8 2s 6d for an outport. New crop early shipment by steamers in October for Hull has made £8 1s 3d, and £8 for shipment all the month, £7 17s 6d has been paid for November steamer to London.

Linseed cakes are in fair demand, but the trade in cotton seed cakes is still inactive Linseed Cakes, London made, per ton, £11; American oblong, New York, in barrels, per ton, £11; Do. do. Westerns in bags, per ton, £10 2s 6d; New York & Boston in bags (E.I. Seed,) per ton, £10 5s@£10 17s 6d; Marseilles square, per ton, £9 10s@£9 12s 6d; Cotton Cakes, English, per ton, £6@£6 5s; Do. Decorticated American, per ton, £7 15s.

Linseed oil is very scarce on the spot, and few sellers are to be found under £25 15s; October-December £25 10s@£25 12s 6d, January-April £25 10s@£25 12s 6d. Hull delivery £25 2s 6d@£25 5s spot and month, £25 October-December, and £25 for the first four months of next year.

Rape and other Seed Oils.—The market for Brown Rape Oil has been very quiet during the week, but closes firm £38 5s@£38 10s spot, £38 10s October-December, and £38 10s@£38 15s January-April—English Refined £40 10s spot—Foreign Refined £40 10s@£41—Crude Cotton Oil £27 10s@£27 15s—Refined £31 10s@£32 spot, £30 for the next three months, and £29 5s January-April. Hull delivery £29 5s spot, £27 10s November-December, and £27 5s for the first four months of next year—Niger Oil £31.

Olive Oils quiet and unaltered—Gallipoli £46 10s, Gioja £45 10s, Bari £44 10s, Tunis £43.

Cocoa Nut Oil continues firm, and for good Ceylon on the spot £37 10s is readily obtainable: for arrival £37 5s@37 10s is the value—Cochin firmer, and business done at £41 on the spot.

Palm Oil.—£38 10s@£39 best Lagos.

Fish Oils.—Sperm £83@£84—Cod £43—Seal £29@£33—Sardine £27—East India £26.

Turpentine, &c.—Spirits steady—American 23s 6d spot, 23s 9d October-December, and 24s 6d January-April—Petroleum Oil firm—1s 7d spot, and 1s 6½d October-December.

—The Smith paper-mill of Lee start their new pulp mill in a fortnight.

PROPRIETORS OF
Callahan Oil Works,
HEMPSTEAD, TEXAS.
Manufacturers of Cotton Seed Oil and Cake, Flour and Corn Meal.

OIL MARKET.

NEW YORK, Tuesday Ev'g October 17.

Linseed oil is firmer and the tendency upward. The impression seems to prevail that there has been more western seed and oil sent east than ever before, and that the western supply will be short. The holders of Calcutta seed are very firm in their views, and most of them will not sell except at an advance on previous rates paid, and the last transaction was at an advance. Crushers have been selling spot lots to dealers at 53c, but we heard that this price had been offered and refused for 5000 gallons. The jobbing price to-day is 55c.

Rapeseed oil is lower, with a quiet market.

Crude whale oil is not in stock in this city, and in the East the market is quiet. There is no change in price for manufactured.

Crude sperm has been active in the East, and at advanced prices with a corresponding advance here in manufactured.

Lard oil of prime make is rather easier for winter cold test, and though some brands carried over from last year are held at 97½@$1 00 there are now sellers of lots guaranteed to stand 45 degrees at 87½c for round parcels. Present make with ice, standing below 50 degrees can be had at from 82 to 87½c with sales of 200 bbls prime city at 82@85c; 150 bbls "Macy's" at 85@87c and 300 bbls Western, to arrive at 82@83c. We also hear that there have been sales of considerable parcels direct from the west to a New York exporter with a through freight to the Continent at a price which would not vary much from 77c at Chicago. The demand for No. 1 oils has been fair, ranging from 65 to 68c for a good grade with sales of 150 bbls. at these prices, and 100 bbls. at 68c.

Crude cotton seed oil has been in better demand, and the new lots coming in sell readily at full prices. The old also sells well, but at comparatively low prices. The sales reported are 75 bbls old at 33c, 72 bbls do at 33c, both on spot and of fair quality; 104 bbls dark on spot, and 50 bbls to arrive on private terms. A lot of 600 bbls old which has been in store since last Fall was sold to a refiner on private terms. Of new we heard of 50 bbls at 40c and 100 bbls at 38c, closing strong.

Summer yellow oil has been quiet but rules firm at 46c as about the value with some reports of inquiry for export. We do not hear of any sales.

Winter yellow is firm at 51c; white 55c for jobbing lots.

Menhaden oil is scarce and higher, as there have been no arrivals. The supply here is mostly in a few dealers hands, and there is said to be very little oil left on Long Island Sound, but we also hear that the catch is better in Narragansett than at any time this year, and one maker took 400 bbls of oil in the last ten days. The price will probably rule firm, however, as the fishing can hardly last long enough to get more than is actually wanted, and should there not be a continuance of the good fishing there may be an actual scarcity, which would result in very high prices. At the close spot oil will bring very high prices, and one party holds good crude at 45c, with a sale of 200 bbls at 42c. The large movement in the east will advance prices there also. The past two days have been too windy for taking fish, and several gangs of fishermen have hauled up. The only sales here are 200 bbls from second hand at 38@40c, and 200 bbls to-day at 42c. In New Bedford 2000 bbls were reported in one sale, and two lots of 500 bbls each and one of 100 bbls all at 38@40c, the latter price paid a the close. We also heard of 250 bbls Sound oil to arrive, and the make for the balance of the season of the two largest concerns to a dealer at a private price.

Bank and straits are higher, but are somewhat irregular, owing to the sudden advance in crude fish.

Domestic cod oil is firm, and 50 bbls sold at 50@52c from first hands. Newfoundland would cost 75c laid down here; we have had none in for a long time.

Olive is a little easy with a better supply; prices are not changed, jobbing at $1 25@1 30.

Palm oil is scarce in Boston, with jobbing sales at 8½c@8¾c for high colored, with no stock of second quality.

Cocoanut is steady with a jobbing demand at 10½c for best Cochin and Ceylon.

Red oil has been in fair demand, with sales of 100 bbls saponified at 54c@55c, and 50 bbls at 55c.

Paraffine oil is firm and scarce at the moment, and most parties look for a further advance in prices. The sales are 120 bbls M & M from second hands to arrive at 28c; 65 bbls Pittsburg 25 gravity at 30c, and 100 bbls on spot at 30c, closing with 32c asked for small lots.

Tallow oil, of City make, has been very dull for a long time past, dealers buying Western, which is much cheaper. The principal city makers ask 80c for double pressed, while Western cold pressed can be had at 72c or less. A lot of 25 bbls double pressed sold from dock at 72c.

West Virginia oils are firm with a good demand, and 300 bbls reduced 29 gravity sold at 23@26c.

OIL CAKE.

The market is steady as gold has advanced though ocean freights are still high and prices in London are rather easier. There is a fair demand for Western thin, and sales were made at a range of $38 25@38 75, with one transaction reported of 150 tons at $39. The market may be quoted at $38 50 at the close.

SEEDS.

Holders of Calcutta linseed are firm, and a sale was made last week of 7000 bags at $1 82½ gold, which is an advance. Domestic seed firm and not plenty.

New Bedford Oil Market.

NEW BEDFORD, Oct. 16, 1876.

The crude sperm oil market the past week has been unusually active. The price has been advanced and holders are now very firm at $1 45 and upward. The sales for the week include 3000 bbls. for export at $1 40; 375 bbls for manufacture at $1 40, an advance of 10c on last week's quotation.

The crude whale oil market the past week has been comparatively dull and sales have been made of 400 bbls. for home use and manufacture at 60c.

Price Current.

Oils—Duty in gold: Olive in casks, 25c; Salad, in bottles or flasks, $1; Linseed or Flaxseed, 7½ lb to gallon 30c. Hemp Seed, 23c; Cotton Seed, 30c per gallon Neats' Foot, Sperm, Whale, Seal, and other Fish of Foreign Fisheries, 20 per cent ad val; Cocoa Nut free; Crude Petroleum, 20c, Refined, 40c per gallon; astor, $1 per gallon.

A New Drying Oil.

The *Elaeococca Vernicia*, or *Tong-Yeou*, a tree growing in China and Cochin-China, produces abundantly a fruit consisting of a capsule filled with grains rich in oil. This oil is easily extracted by pressure, has a density of 0.9362, and possesses a variety of curious properties. According to Cloez who has lately submitted it to thorough investigation, it drys more rapidly than any other known oil, a coating of it applied to glass or clean metallic surfaces becoming dry in a very few hours. An attempt will probably be made to acclimatize the plant in Algeria, with a view toward rendering it useful in the arts and introducing it into commerce. One of the most remarkable facts connected with the oil is its power of solidifying under the action of the light and out of contact with the air. Heated in the air it also becomes solid; this change being, however, a chemical one due to oxidation.

The oil well below West Middlesex produces a few gallons of oil every two or three weeks, by means of the sand pump. The oil is of a superior quality for lubricating purposes, and is used by some of the manufacturers of West Middlesex for that purpose. A strong volume of gas flows from the well all the time, which Mr. C. A. Eteburn, who resides in the immediate vicinity, utilizes in his house, both for light and fuel. The well is between 1500 and 2000 feet deep, but it is believed the oil-bearing rock is about 700 feet from the surface.—*Sharon Herald.*

PAINT MARKET.

New York, Tuesday Ev'g, Oct. 17.

While the jobbing trade for paints is at times good, general business is dull, and as a rule prices are hard to advance.

The Philadelphia corroders of white lead have been offering dry lead in the market during the past month, which is an occurrence we have never heard of before. There has been an arrival of Rochell ochre, and our previously bare market is now supplied. Carmine is firm and likely to go higher.

The exports since January 1, 1876 are as follows:

	Pkgs.	Values.
Oxide of Zinc	2752	$38 587
White Lead	391	2,719
Red Lead	5	48
Ultramarine	33	1495
Vermillion	30	2,012
Paints not spec	3481	61,527
Varnish	1545	27 752

City brands of lead in oil are in fair request, jobbing at 10@10⅛. Dry can be had at 8½@9c. English BB we quote at 10⅛c gold on dock. Sales of 20 tons on spot at 10⅛c gold.

Venetian Red—There is a good supply with a fair demand. Bell Brand quoted at 1¾c; 50 bbls Cookson's sold at $1 85.

American zinc, 2.1 grade, continues in small supply, and selling freely at ¼c in advance of the ruling summer rates. We now quote 5⅞@6 for good grades.

French zinc is quiet, but there are no more lots offering at the price named last week. The price now is 8½c gold for V M and 8⅜c gold for L Z O.

Chalk has sold to the extent of 250 tons, at 1 80@1 90c gold, closing firm.

Whiting is in good demand and firm at 50c for common, with a sale of 100 bbls at 50c and 1000 bbls kiln dried and bolted at 82½c. Gilders in small supply.

Barytes.—Foreign is in full supply with little demand. Best Domestic is held firmly. We quote Foreign $22@35 per ton, according to quality. Eastern refined held at $32@35; Western refined $40, and best Western floated at $45@48.

Paris White is firm, with a small supply. A lot of 25 tons cliffstone sold at $1 65.

China clay of poor quality is nearly all sold out; a good article sells at $25 from store; paper maker's selling at $17 50 gold. American is selling at $14@15 cy.

Umber.—Raw lump Turkey is now jobbing from store at 1⅞@2c per lb.

Orange mineral is jobbing at steady prices, with sales of 5 tons F B & W, at 11½c gold; kegs 11¾c, gold; Cookson's 11½c gold on spot.

English red lead in single packages is selling at 9½c gold, American 8½c currency.

Ochre in fair demand and there has been an arrival of Rochell, and 75 casks sold at $1 50 gold.

Quicksilver vermilion is jobbing freely. The list prices are:

In lots of 300 lbs and over, in 30 lb or 50 lb. bags, 70c. gold. In lots of less than 300 lbs. in 30 lb. or 50 lb. bags, 72½c gold. In bulk, kegs of 100 lbs. or over, 68c. per lb. less. Terms, cash in ten days, or interest added.

Chinese vermillion is jobbing at 80c gold.

American is in better jobbing demand, with sales of 6 tons at 15½c.

Carmine is selling better, as an advance is expected on account of the increased cost. Prices of the Associated Manufacturers for pure No. 40 carmine are quoted as follows: In bulk 1 to 10 lbs. $5 35 per lb; 10 to 25 lbs, $5 20 per lb; 25 to 50 lbs, $5 10 per lb; 50 lbs. and upward, $4 85, all gold. In 1 lb. bottles or boxes, $5 50, $5 35, $5 25, $5, all gold. In 1 oz. vial, $1 gold per lb more; Nakarat, $1 gold per lb more than No. 40 cash, 30 days.

Paris green entirely nominal at 26c.

CEMENT FOR WOOD VESSELS REQUIRED TO BE WATER-TIGHT.—Amixture of lime clay and oxide of iron separately calcined and reduced to powder, intimately mixed, kept in a close vessel, and mixed with water when used.

—The Iron City Glass Works, at Fayette City, Pa., up the Monongahela, will resume operations in a week or two. Schmertz's works at Bellveurnon, are running full handed.

—The new Bellaire (O.) Glass Works is rapidly approaching completion.

—The Pittsburgh Flint Glass Works, Bakewell, Pears & Co., were established in 1808—sixty-eight years ago.

—The schooner Bibanan, of Montreal, with coal oil for Montreal, while passing down the St. Lawrence Thursday afternoon got out of the main channel and ran on the shoal above Alexandria Bay and sunk.

—It is asserted by experts that oxide of zinc is valuable as an anti-incrustator for steam boilers.

PAINT MARKET.

New York, Tuesday Ev'g, Oct. 17.

While the jobbing trade for paints is at times good, general business is dull, and as a rule prices are hard to advance.

The Philadelphia corroders of white lead have been offering dry lead in the market during the past month, which is an occurrence we have never heard of before. There has been an arrival of Rochell ochre, and our previously bare market is now supplied. Carmine is firm and likely to go higher.

The exports since January 1, 1876 are as follows:

	Pkgs.	Values.
Oxide of Zinc	2752	$38 587
White Lead	391	2,719
Red Lead	5	48
Ultramarine	33	1495
Vermillion	30	2,012
Paints not spec	3481	61,527
Varnish	1545	27 752

City brands of lead in oil are in fair request, jobbing at 10@10½. Dry can be had at 8½@9c. English BB we quote at 10½c gold on dock. Sales of 20 tons on spot at 10½c gold.

Venetian Red—There is a good supply with a fair demand. Bell Brand quoted at 1¾c; 50 bbls Cookson's sold at $1 85.

American zinc, 2d grade, continues in small supply, and selling freely at ¼c in advance of the ruling summer rates. We now quote 5⅞@6 for good grades.

French zinc is quiet, but there are no more lots offering at the price named last week. The price now is 8½c gold for V M and 8⅜c gold for L Z O.

Chalk has sold to the extent of 250 tons, at 1 80@1 90c gold, closing firm.

Whiting is in good demand and firm at 50c for common, with a sale of 100 bbls at 50c and 1000 bbls kiln dried and bolted at 82½c. Gilders in small supply.

Barytes.—Foreign is in full supply with little demand. Best Domestic is held firmly. We quote Foreign $22@35 per ton, according to quality. Eastern refined held at $32@35; Western refined $40, and best Western floated at $45@48.

Paris White is firm, with a small supply. A lot of 25 tons cliffstone sold at $1 65.

China clay of poor quality is nearly all sold out; a good article sells at $25 from store; paper maker's selling at $17 50 gold. American is selling at $14@15 cy.

Umber.—Raw lump Turkey is now jobbing from store at 1⅞@2c per lb.

Orange mineral is jobbing at steady prices, with sales of 5 tons F B & W, at 11½c gold; kegs 11¾c, gold; Cookson's 11½c gold on spot.

English red lead in single packages is selling at 9½c gold, American 8½c currency.

Ochre in fair demand and there has been an arrival of Rochell, and 75 casks sold at $1 50 gold.

Quicksilver vermilion is jobbing freely. The list prices are:

In lots of 300 lbs and over, in 30 lb or 50 lb. bags, 70c. gold. In lots of less than 300 lbs. in 30 lb. or 50 lb. bags, 72½c gold. In bulk, kegs of 100 lbs. or over, ⅝c. per lb. less. Terms, cash in ten days, or interest added.

Chinese vermilion is jobbing at 80c gold.

American is in better jobbing demand, with sales of 6 tons at 15½c.

Carmine is selling better, as an advance is expected on account of the increased cost. Prices of the Associated Manufacturers for pure No. 40 carmine are quoted as follows: In bulk 1 to 10 lbs, $5 35 per lb; 10 to 25 lbs, $5 20 per lb; 25 to 50 lbs, $5 10 per lb; 50 lbs. and upward, $4 85, all gold. In 1 lb. bottles or boxes, $5 50, $5 35, $5 25, $5, all gold. In 1 oz. vial, $1 gold per lb more; Nakarat, $1 gold per lb more than No. 40 cash, 30 days.

Paris green entirely nominal at 26c.

CEMENT FOR WOOD VESSELS REQUIRED TO BE WATER-TIGHT.—Amixture of lime clay and oxide of iron separately calcined and reduced to powder, intimately mixed, kept in a close vessel, and mixed with water when used.

—The Iron City Glass Works, at Fayette City, Pa., up the Monongahela, will resume operations in a week or two. Schmertz's works at Bellveurnon, are running full handed.

—The new Bellaire (O.) Glass Works is rapidly approaching completion.

—The Pittsburgh Flint Glass Works, Bakewell, Pears & Co., were established in 1808—sixty-eight years ago.

—The schooner Bibanan, of Montreal, with coal oil for Montreal, while passing down the St. Lawrence Thursday afternoon got out of the main channel and ran on the shoal above Alexandria Bay and sunk.

—It is asserted by experts that oxide of zinc is valuable as an anti-incrustator for steam boilers.

Zinc Tungstate as a Pigment.

This new pigment is of a snowy whiteness, and possesses qualifications that make it valuable in the finer varieties of oil painting, and it is reasonable to believe that probably it will be adopted for such purposes.

It may be prepared in the following manner: *First*—The tungstate of soda is obtained by adding pulverized *wolfrom* (a mineral in which tungsten occurs, combined with iron) to an equal weight of fused sodium carbonate; this mixture is subjected to heat, which is continued for some time: the mass which results on cooling is pulverized and treated with water, and the filtrate is evaporated to dryness; tepid water is then added to the residue, from which sodium tungstate crystallizes in transparent rhombic crystals, in the form of tables or scales; which contain two molecules of water of crystallization. It is bitter to the taste, alkaline in reaction, permanent in the air, soluble in four parts of cold water in two parts of boiling water, insoluble in alcohol, etc. This salt is sometimes used in place of sodium stannate, as a mordant in dying and calico printing; also for rendering linen, cotton, etc., uninflammable.

Secondly—The zinc sulphate (*white vitriol* or *zinc vitriol*), which is the salt that is usually employed conjointly with the above sodium salt for the production of *zinc tungstate*, may be prepared by dissolving the oxide or carbonate of zinc in dilute sulphuric acid, or on a large scale by roasting the native sulphide of zinc and lixivating with water, the zinc sulphate separating from the solution in rhombic prisms.

Lastly—The pigment itself is prepared by dissolving the zinc sulphate and the sodium tungstate, adding the two solutions together, when a beautiful snow-white precipitate is obtained, consisting of zinc tungstate; this is collected on a filter and dried, after which a white powder results, possessing an excellent *body*, which when mixed with a drying oil, forms a paint that is to be highly recommended. On a large scale the tungstate of zinc may be prepared by fusing together one part of sodium tungstate, two parts of zinc chloride, and two parts of sodium chloride; the resulting product is boiled with water, which yield prismatic crystals of sodium tungstate on cooling.

The tungstate of lead and mercuric tungstate also form equally fine white powders; but zinc tungstate has advantages over these as a pigment, inasmuch as it is not effected by sulphide of hydrogen, which abounds so plentifully in some atmospheres.—*Painters' Magazine.*

For the protection of workmen handling lead and mercury compounds, M. Melsens of Paris France, recommends small daily doses of iodide of potassium. This salt he says, dissolves the lead or mercurial compounds, and effects their removal.

CHEMICAL MARKET.

NEW YORK, Tuesday Ev'g, Oct. 17.

There is a difference of opinion as to the present state of the heavy chemical market. Some parties report a dull trade and easier feeling, while others report strong prices both here and abroad with a fair demand. We hardly think there has been so much done the past week as for a few previous weeks.

Soda ash is quoted by cable to-day at 1 13-16d@1⅞d, with one brand. Wilson's, held at 2d. The market is strong for caustic ash and the sales making are at full prices. We hear that Tennant's 48 per cent has sold at 2 1-16c gold, and other caustic soda at from 2 @ 2⅛c gold. Carbonated kinds have sold at from 1 95 @ 2c gold. We heard that 50 tons Hutchinson's and 50 tons Marsh sold at the latter price, and 250 tons various brands sold at 1 95@ 1 97½c gold.

Caustic soda is quoted from Liverpool to-day at £15 10s, for 70 per cent, and £13 5s@£13 10s for 60 per cent. The prices here are 4 56¼@4⅝c gold for 60 per cent. and 4 40@4½c gold for 70 per cent. There was an invoice of Bridgewater 60 per cent offering at 4½c gold from dock, but most good brands are held at 4⅝c gold. Sales 400 drums, ranging from 4⅜ to 4⅝c for different tests and brands. The tone here is easy at the close, with a moderate demand; other side firm.

Bleach is quoted to-day by cable at £7, the same price as last week. The market here for fresh lots lots of high test is higher. We heard to-day of a lot of 50 casks, a prime brand, sold at 2 1-16c currency. There have been sales of good brands to the extent of 800 casks on spot and rest of year delivery at 1 95c@2c currency.

Bicarb is quiet and easier for foreign, with sales of 100 kegs at 4 10c gold.

Sal soda on spot has been selling at 1 42½@1 45 gold, but to arrive there have been sales at 1 35 gold. The transaction on spot and to arrive foot up 275 tons at 1 35@1 45c gold.

Cream tartar is steady on spot with no surplus stock offering.

Chlorate of potash is quiet, and we hear of no further sales of lots; 24½c gold is the spot price.

Brimstone is in a rather uncertain position. Last week there was a sale of 75 tons on spot at $40 gold free, and 400 tons yesterday on spot at $35 gold in bond.

Nitrate of soda is firm both here and in London. In the latter place 13s per cwt is now the price. On spot here 500 bags have been jobbed out at 3c gold and a cargo of 6000 bags afloat on private terms.

Acetate of lime is without change but rules firm.

Alum is firm with a fair demand with sales of 200 bbls.

Arsenic on spot is still scarce, but the supply near at hand is plenty.

Philadelphia Chemical Market.

PHILADELPHIA Oct. 17, 1876.

Chemicals continue in active demand, although on the whole the market is not so firm. Few of the sales have been made to consumers; transactions have principally been between the dealers. Consumers generally think the advance abroad is based on an active market this side the Atlantic, and they fail to see from their standpoint anything to warrant this. We are advised of large transactions on the other side for home consumption, as well as with the continent, besides sales for America. In 48 per cent carbonated, as well as caustic ash, we hear of no transactions over 1877. Some business has been done in high test ash, bleach and caustic.

Quotations, with sales at our figures, are as follows:

Carbonated 48 per cent ash, Newcastle and Liverpool, 1 95 @ 2 1-16c gold.

High test carbonated ash 2 @ 2⅛c old.

Caustic 48 per cent ash 2 @ 2⅛c gold; sales to arrive at 2 1-16c gold.

Bleaching powders 1¾ @ 2⅛c currency, latter for "Deacon's."

Sal soda 1 57½@1 65c currency from store; to arrive and for shipment 1 35@ 1 40c gold.

Caustic soda 60@62 per cent 4⅝ @ 4 70c gold to arrive; 5⅛ @ 5¼c currency from store; stock light. Caustic soda 70@72 per cent, 4½@4⅝c gold for 60 per cent. Caustic soda 76 per cent, nominal price 4¾c for 60 per cent.

Bicarb soda, English, 4⅛c gold. Bicarb soda, American, 3¾ @ 4¼c currency.

Chlorate of potash quiet at 24½@25c gold for off brands; "Greenbank" held higher.

Oxalic acid held at 11½@11¾c gold.

Bichromate, Scotch, is offered at 15⅞c currency.

SPECIAL NOTICES.

Blue Vitriol.

The Analysis of Technical Products.

BY

M. GABRIEL POUCHET.

Translated for the AMERICAN CHEMIST *by S. A. Goldschmidt, E.M. Ph.D.*

CHLORATE OF POTASSA.

This may be tested in two ways. Either a salt of iron may be oxidized by means of a known weight of chlorate, or by reducing the chlorate to chloride through the aid of a saturated solution of sulphurous acid and titrating with argentic nitrate. The first method is liable to error, as a portion of the chlorine is lost if added to a too acid solution of iron.

By the second the results are exceedingly accurate.

Ten grammes chlorate to be tested are dissolved in 100 c.c. H_2O, to which are added 250 c.c. saturated solution sulphurous acid. Warm, at first gently, then to boiling, to remove excess of sulphurous acid. Cool and dilute to 500 c.c., in 10 c.c. titrate with potassic chromate and argentic nitrate, and calculate the amount of chlorate from the fact that 100 c.c. normal silver solution corresponds to 2.10 potassic chlorate.

ALUM AND SULPHATE OF ALUMINA.

Nearly all the alum manufactured at present is made by the Chaptal process. This consists in transforming the silicate of alumina existing in calcined and argillaceous schists or kaolin by heating in contact with sulphuric acid of 58° to 60° B. The silica separates, leaching the solid mass known as raw sulphate of alumina, a solution is obtained which, concentrated and mingled with potassic or ammonic sulphate, yields a corresponding alum. The schists employed for this purpose must be plastic, and as free as possible from carbonates of iron and lime. The complete analysis of the schists is a long and delicate operation, but should be made quite often if a correct knowledge of the workings is required. The valuation of the alumina is, however, much more easily determined.

50 grammes of the schists are heated to a dark red in a tared platinum or porcelain crucible; the loss represents moisture and volatile matter (water of combination and organic matter).

—On searching an old house recently sold at Gloucester, upwards of 2,000 empty vials which once contained paregoric were found scattered about the premises, in the closets, cellar, attic and woodshed. It is supposed the contents of these bottles were consumed by some poor victim of this gentle narcotic, who formerly lived there.

DYES.

NEW YORK, Tuesday Ev'g, Oct. 17.

Gambier has been a very active article for the past week or ten days, the sales only just becoming known. The prices at which these sales and resales have been made are at or below the present cost, the parcels on the way having been bought when the Singapore market was lower than at present. It is also supposed that the stock throughout the country is very small, dealers and consumers having bought only for immediate wants in anticipation of lower prices when the lots on the way come to hand. The "Witch," with 200 tons is expected, but her cargo was high cost and will be jobbed out at old rates before any of the low-priced stock comes to market. The spot price is 5½c gold. The sales are 200 tons, per "Witch," at 5¼c gold; 200 tons, per "Verona," at 4½c gold; 100 tons, per "Gates Head," at 4½c gold; 300 tons, per same, at 4@4½c gold, and resales, per same, of 300 tons at 4¼@4½c gold; also 200 tons by an another vessel on private terms.

Indigo has been in fair demand, and 12 cases Bengals sold at 1 10@$1 20 gold, and some very fine at $1 75 gold.

Cochineal has been in active demand and all the seconds have been taken from market, buyers, paying up to 63c gold. There has not been so much done in firsts, but we hear of 75 ceroons firsts at 65@66c gold.

Cutch has sold freely, and up to 6c gold has been paid; now held higher.

Dutch madder has sold to the extent of 40 casks at 7@7½c gold. There has been considerable done in garancine, but we have no particulars, except that full prices have been obtained.

Bichrome is quiet, and a Boston party has been offering a contract of 25 casks Scotch per month at 15¾c; most holders ask 16c.

Sumac has been in good demand and we note sale of 1,600 bags Dalia and Amato which are now held at $105 gold, and 300 bags "King's Crown," a Virginia brand, on private terms. This brand is now held at $65.

CHROME YELLOW, RED, AND ORANGE.

For yellow: dissolve 10 parts plumbic acetate in 10 parts hot water, and dilute with 10 parts cold water. Also, dissolve 2 parts potossic-dichromate in 10 parts hot water, add 1 or 2 parts sulphuric acid. spec. gr. 1 84, and dilute with 10 parts cold water, When *cold*, mix.

For red: the dichromate is mixed with a definite quantity of potassic hydrate, and then precipitate by plumbic acetate.

For orange: dissolve 3·8 parts potassic dichromate in 10 parts water, and add carefully 3 6 parts crystallized carbonate of soda. Pour this solution into a solution of equal parts of plumbic acetate and water and boil half an hour.—FAUDEL in *Polyt. Notizblatt.*

PAINT, WONDERFUL DISCOVERY.

All who propose to paint should write INGERSOLL PAINT WORKS, 261 Front st., corner Dover st., New York. On receipt of postage-stamp they will send free their work on painting and selecting colors, with samples. They have ample evidence of its enduring twenty years. This is startling; yet the paint looks better, and is cheaper, than any first-class lead or zinc paint. All dealers should keep it.

WEDNESDAY, OCT. 18, 1876.

Weekly Review.

The increased activity noted for some time past continues, and the prospects are better than before. There is more disposition to operate on a large scale, and the tendency of prices generally is upward. There have been no influences to operate unfavorably; no failures of any account are reported.

Our local money market has been easy most of the week.

The ordinary rate for call loans has been 2@3 per cent.

Commercial paper is mostly sold at 5@7 while some choice short-date paper is still sold at 4@5 per cent.

Government bonds have been firmer. The closing prices bid on Monday were as follows:—

U S 6s 1881, reg	116¾
U S 6s, 1881, coupon	118¾
U S 5s, 1881, reg	113
U S 5s, 1881, coupon	114¾
U S 5-20s, called	
U S 5-20s, 1865, reg	109¾
U S 5-20s, 1865, coupon	112⅞
U S 5-20s, '65, new reg	112⅜
U S 5-20s, '65, new coupon	112⅝
U S 5-20s, 1867, reg	115⅜
U S 5-20s, 1867, coupon	115⅝
U S 5-20s, 1868, reg	116⅛
U S 5-20s, 1868, coupon	116¾
U S 10-40s reg	114⅜
U S 10-40s, coupon	115⅛
U S currency 6s	124

Foreign exchange has been stronger this week. The closing prices on Monday were as follows:

Sterling, 60 days, nominal	$4 84
Do sight, nominal	4 85½
Do 60 days, actual	4 83¼@4 83¾
Do sight actual	4 84¼@4 85
Cable transfers	4 85¼@4 86½
Commercial sterling, prime long	4 82½@4 83
Do do good	4 81@4 81½
Paris, Bankers, 60 days	5 20⅝
" sight	5 18⅛
Antwerp, bankers, 60 days	5 19⅜
" sight	5 16⅞
Swiss, bankers, 60 days	5 19⅜
Do sight	5 16⅞
Reichsmarks, (4), bankers, 60 days	94⅝
Do sight	95⅛
Guilders' bankers, 60 days	40
Do sight	40¼

Gold has gone lower than before in the present downward tendency. The prices each day during the week were as follows: Tuesday, 108⅞@109; Wednesday, 108⅞@109⅛; Thursday 108⅞@109; Friday, 109@109⅛; Saturday, 109⅛@109⅛; Monday, 109⅛@109¼.

New Inventions.

(Specifications furnished for 50 cents.)

JENNEY'S IMPROVEMENT IN RESINOUS SUBSTANCES.

In the purification of hydrocarbon oils produced by the distillation of crude petroleum, asphalts, or bitumens, or by the destructive distillation of coal, resins, or bituminous shales, the oils are agitated with two per cent or more, of concentrated sulphuric acid, (66° Baume, 1.86 specific gravity), in order to remove certain oils contained in the distillate, which would, in course of time, absorb oxygen from the air, and cause the oil to become dark colored and gummy, and also to remove tarry substances and the disagreeable odor. Sulphuric acid combines chemically with these bodies and dissolves them, forming a dark red heavy liquid, which settles on the bottom of the agitator, and can then readily be drawn off from the purified oil. This peculiar compound of sulphuric acid and hydrocarbon oils, dissolved in the excess of acid, is known as sludge. At present it is purchased by superphosphate manufacturers, who mix it with a little water, which decomposes the compound of acid and oil, producing a weaker acid, (about 50° Baume,) used in the manufacture of superphosphate of lime, and a dark-colored offensive oil, which rises to the surface of the acid, and usually is thrown away, no commercial use having been found for it. This waste product is called "sludge oil.

My invention consists in producing from this sludge oil, or other substantially equivalent substance. a new manufacture or resinous substance.

The mode of practicing my invention is as follows: After the sludge has been washed with petroleum naphtha, to remove any illuminating-oils mixed with it, and the sludge has been decomposed by the addition of water. the sludge oil is drawn off, and then purified by repeated washings with water until the acid remaining in it is removed. For this purpose equal volumes of water and sludge oil may be used, but the washing can be effected by a less quantity of water. The remaining oil is then neutralized by quicklime or caustic soda. The purified oil has a strong and somewhat disagreeable odor, and contains about ten per cent. of volatile oils, which are converted into a hard resin, with difficulty, to remove these volatile substances. Sludge oil thus purified is introduced into a still, with the addition of from two to four per cent of caustic soda, or caustic soda and about two per cent. of the oxides of lead or manganese, to oxidize any sulphur in the oil, and combine with it, and steam is then blown through the oil, the oil being kept hot either by a fire under the still, or by the use of steam heated to the required temperature, between 212° Fahrenheit and 450° Fahrenheit. The action of the steam is continued until no more volatile oils are removed, usually from five to ten hours. The steam is then shut off, and the contents of the still allowed to settle, when a sediment of tarry impurities and soda subsides, from which the pure oil may be drawn off. The oil is then introduced into a still or tank, and oxidized by blowing currents of air through it, the oil being kept at a temperature of from 100° Fahrenheit to 300° Fahrenheit, either by a slow fire under the still, or by a steam coil in the bottom of the tank, or by heating the air in the hot blast oven, or otherwise to the proper temperature before it is blown through the oil; and the action of the air is continued until a sample taken from the contents of the converting vessel is, on cooling, found to be a resinous substance of a greater or less hardness or consistency, as may be required for the particular purpose to which it is to be applied; and after letting the contents of the still settle, the hot resin is drawn off from the sediment of soda and impurities.

The time required to effect the oxidation of the sludge oil varies with the working temperature and with the extent of surface of oil brought into contact with the air. I may define it as between four and twelve days generally, but by an excessive use of air the time may be shortened to even less than four days. The action of the air may be accelerated by adding about two per cent. of the oxides of lead or manganese, or about two per cent of the manganates of soda and potassa to the oil. These substances act either by giving up oxygen to the oil, or by their presence inducing a combination of the oxygen and the hydrocarbon.

An inferior quality of this resinous substance may be produced by treating the washed sludge oil in a still with caustic soda and litharge (five per cent soda to one to five per cent litharge), and blowing a current of air through it at about a temperature of 350° Fahrenheit, which at the same time oxidizes the oil, and removes the more volatile portions, which are distilled off until it is converted into a resinous substance of the required hardness. This process last mentioned requires from two to six days, but the resin produced is of a darker color than that made by first treating with steam, and then with air at a lower temperature, as the coloring matter is not effected by steam at 400°, while air at that temperature rapidly darkens it by oxidation. Sunlight bleaches the color of sludge oil, and at the same time greatly accelerates the absorption of oxygen from the air. To produce the lightest colored resin the sludge oil is steamed with five per cent. of soda, 20° Baume, at a low temperature, about 200° to 250° Fahrenheit, for ten hours, to remove the more volatile portions, and then oxidized and bleached by exposing the oil in shallow tanks covered by glass to the action of sunlight, the oil being kept hot and fluid by a steam coil in the bottom of the tank, and currents of air blown through it to produce oxidation. The working temperature in this case should not exceed 250° Fahrenheit.

Inferior qualities of sludge oil, as those produced in the purification of lubricating oils, and which contain a large quantity of tarry substances. are treated as follows: The oil is charged into a still and caustic soda and black oxide of manganese (in the proportion of about five per cent soda and two per cent of manganese) are added, and the charge distilled by a current of steam blown through the oil, assisted by a fire under the still, until only tar and coke remain behind. The distillation commences at about 350° Fahrenheit, and the fire being increased the temperature in the still gradually rises to about 800°, when only the thick pitch remains in the still. By the use of steam under pressure, especially when superheated, the oil can be distilled with scarcely any decomposition, and the distillate, which is of a yellow or light red color, can be converted into a superior light-colored resinous substance by oxidizing it with currents of air at the lowest possible working temperature.

The resin produced by this oxidation of sludge-oil is distinguished from all other known resins and resinous substances whatsoever by its behavior with different chemicals and solvents. It varies in color from yellow to dark garnet red, according to the method of its production. It is hard, brittle, and odorless at ordinary temperatures when oxidized as completely and thoroughly as possible. It is tasteless, insoluble in, and not acted upon by, water, caustic soda, potassa, or ammonia, even when heated. Alcohol of ninety-five per cent. dissolves but small quantities of this resin even when boiled with it. It may be considered practically insoluble in alcohol. Petroleum-naphtha dissolves it very rapidly without the aid of heat. Spirits of turpentine readily dissolve it, especially on warming. Ether, benzole, chloroform, and bisulphide of carbon all dissolve the resin. A mixture of ether and alcohol, in the proportion of two parts of ether and one part of alcohol, quite readily dissolves this resinous substance, but not so readily as pure ether. Linseed oil and olive oil dissolve the resin when heated with it. Concentrated sulphuric acid dissolves it completely. The resin separates again on adding water. Nitric acid attacks it violently and converts it into a brown, tarry, or gummy substance, having a pleasant, peculiar odor. Hydrochloric acid seems to have little or no action on it.

It is well known that it has been proposed to use sludge-oil as a paint-oil, but this has not been attended with practical success.

I do not wish to be understood as laying any claim in this case to the process by which my improved resin is obtained, as that forms the subject of another case filed by me.

This resin, when dissolved and mixed with suitable solvents, produces a varnish having novel and characteristic properties. I do not claim in this application such varnish as that is made the subject of another application by me now pending, and to which I refer for a more particular description of said varnish.

Oils at the Centennial Exhibition.

It is to be regretted that some arrangements were not made by which the oils for lubricating purposes were put to a thorough scientific test to determine their true values. Some standard and generally accepted mode of testing oils is much needed, and those interrested in the business would have been much edified by the perusal of a thorough report by the experts appointed to make the necessary tests. Apropos of this subject we notice that but few of our lubricating oil manufacturers have availed themselves of the opportunity of properly exhibiting their productions. They have let pass a grand opportunity to display their goods to the world, and particularly to the European visitors, who might by that means have some of their conservative prejudices overcome, and lead to an increased demand from abroad. Perhaps they will now take the hint and be better prepared for the next Centennial Exposition at Denver or Sitka (Alaska) in 1976.—*Am. Manufacturer.*

Centennial Notes.

PHILADELPHIA, Oct. 14, 1876.

We find scattered in nearly every department some articles of special interest to our readers, and this week

we shall briefly mention those things to be seen in

AGRICULTURAL HALL,

A large building containing those things of most interest to any one engaged in agriculture. The plows, harrows, threshing machines, etc., might serve their purpose quite as well without paint and oil, but they would certainly be less attractive in appearance were they not tastefully painted with American vermilion. We noticed that a large number of the implements were labeled, sold to the Japanese Government.

THE BRYAN MANUFACTURING CO.

This is the only exhibit of cottonseed oil by a manufacturer to be seen at the whole Centennial, and it is to be regretted that this large and important American manufacturing interest should not have been shown by at least one of the large refining concerns. In the Main Building two jobbing firms show samples of refined cottonseed oil among other kinds, but either the Union Oil Co. or J. V. Lewis & Co. should have made an exhibit worthy of this important branch of the oil trade. The Bryan Co. make only crude, and of this they show five jars, which being large do not show the oil to any advantage, but still the Bryan Co. deserve credit for making an exhibit. The Selma Oil Co. were to have displayed their oils but as Mr. Geo. O. Baker was appointed one of the judges his feelings of justice restrained him. Mr. J. J. Powers, of Vicksburg, was also appointed commissioner from his State.

WAHL BROS.

The goods exhibited by this Chicago firm are labeled pure and No. 1 neatsfoot oil and glues of all varieties, from dark thick pieces to the thinnest transparent sheets. Wahl Bros neatsfoot oil is well known in our market.

The French Chemical Department.

(Continued.)

A. POIRRIER & CO.

We shall not attempt to describe the exhibit of the above firm; it deserves more than can be said in these brief notices. The colors they show are superb and very tastefully arranged. We shall give our readers a special description of the contents of their case.

COIGNET, SON & CO.

The above firm of Paris are represented in this country by C. Dord & Co., 142 Grand street, New York. Their case forms the short part of one of the four which contain the French exhibit of chemicals. This firm manufacture and show samples of fine grades of blues and gelatine, the latter in thin transparent sheets both white and red. In their case there are also six bottles, the contents in color ranging from a light to a dark gray. These bottles are labelled *Engedis*, and have initials showing the different grades.

CLAUSEAU, PERE & FILS, PALUN & CO., AVIGNON.

The contents of this case are of great interest, inasmuch as there are several articles new to us. We will first mention the madder roots which are said to be three years old, taken from ground, called palud. There are two different grades of ground madder which are used for dyeing wool, cotton and print cloths. Four grades of garancine are shown, designated as follows:

Garancine, American quality, for printing calico in all colors such as red, puce, chocolate, black and purple.

Strong garancine for printing, but richer in colors.

Extra strong superior garancine for Turkey red, quality used in Elberfeld.

Extra strong superior garancine used in Glasgow for Turkey red, dyeing of yarns and cotton clothes.

Then a patented article called rubi alizarine, which is to be used more especially for printing pink and purple colors on calico. Flowers of madder, which is madder washed and in such a quality as is used in Minthouse for dyeing reds, pinks and purples. They show the madder products in a crystallized form which are said to be chemically pure, and termed natural sublimated alizarine and puperine.

There were two samples of alcohol which were obtained by the fermentation of the sochaine matters of the madder root, and are used in the manufacture of absinthe and other French liquors. This same case contained madder seeds, whole or ground but they are not for dyeing, but are a patented indiginous hygenic coffee. They are said to have the same aroma and are used either mixed with coffee or alone. We have many a time enjoyed a French cup of coffee, but madder seeds never occured to us. We will think of them next time.

HARDY MILORI.

Milori's colors are too well known to need much of a display. The case contains a modest but good assortment; the greens are especially fine. Many medals are shown which have been awarded for expositions. Any diploma that Milori gets at the Centennial will be for intrinsic merit rather than a large display.

F. RICHTER.

The above manufacturer of ultramarine is located at Lille, France, with Messrs. Geisenhelmer & Co., of 22 Liberty street, this city as agents. They show samples of the different varieties of ultramarine manufactured by them and which has been so much liked by some consumers in this country.

E. COEZ & CO.

Of St. Denis near Paris, are represented in this country by Messrs. J. C. Bloomfield & Co., New York. This firm exhibits large and numerous samples of exceedingly handsome extracts and carmines of dye woods, which are used for dyeing, printing and tanning.

This firm have heretofore received medals and awards for merit at the various Paris, London and Vienna exhibitions.

A. KAULEK.

This manufacturer of extracts of dyestuffs has perhaps, the largest and best display at the whole exhibition. His brand of extracts is favorably known in this country, where he is already doing a large business, which he will probably still increase in the future. The representative of Mr. A. Kaulek is August Klipstein, 32 Platt street, New York, who will execute all orders forwarded to him.

CHAS. ROUX & FILS.

The above named firm is located at Marseilles, and are one of the oldest, if not the oldest manufacturers of soaps in France. Not only do they stand first in this respect, but they have also received the highest honors for progress, the founder of the firm having had a noble title conferred on him as an acknowledgment of the improvement he has made in the manufacture of soaps. The exhibit of Messrs. Roux & Fils is in the centre of the square formed by the four els of the French chemical department, and consists of high blocks of different kinds of castile soap, also a variety of seeds and the oils extracted from them for the purpose of soap making; such as sesame, olive, peanut and Sain douz.

RIGAND & DUSART.

Messrs. Rigand & Dusart, successors to Grimault & Co., are represented in this country by Messrs. E. Fougera & Co.—North William street, Their case is large, and their goods of a superior quality. The arrangement is with excellent taste, and show off their manufactures to the best advantage, and their display is considered very fine. The articles most conspicuous are the leaves of jaborandi and boldo, silvered pills, and a variety of lozenges. These are rare fine chemicals. Solutions and essences in great variety. Many of the articles are in jars, with bright, red cotton surrounding them, except on the front of the jars.

D. VALBY.

Of Dijon, shows in his case a great variety of capsules of different substances and shapes.

Surgical Instruments.

There are some half dozen or more exhibitors of surgical instruments in the French department, but as these can hardly be intelligently described we will merely make mention of those who are most prominent.

VERGNE & CHOSE BROS.

This firm is located in Paris and have the largest display.

BENAS AND J. VERNIER.

These manufacturers exhibit a good variety, and testify to the public that their manufactures are endorsed by the Academy of Paris.

BRIERE, OF PARIS,

A variety of nursing bottles.

RONDEAU FRERES

Call attention to their trusses, covered with plastic India rubber, which they claim are superior to any trusses made in the world. Their agent in this city is G. Pernet, 2228 North 3rd street, Philadelphia.

DR. H. CLERY.

Dr. Clery, of Marseilles, manufactures a powder for the prevention, as he claims, of asthma, and which he calls anti-asthma powder. If this will prevent or ever achieve the cure of this troublesome disease so prevalent in this country, Dr. Clery should find a large sale for it here.

In the list of Centennial Awards to the trade, published in our last issue, we omitted the name of H. Planten & Son, New York, who received an award, in Group XXIV., for "Gelatine Capsules for Liquid and Solid Substances."

The Fire on the Hearth.

We call the attention of our readers to the simple and attractive warming and ventilating apparatus, known by the above title, and made by The Open Stove Ventilating Co., of this City, which has won its way to popular favor with remarkable success.

It is a double stove, with two currents; one carrying the products of combustion to the chimney, the other circulating warmed air through the room.

It has all the sanitary advantages of old fashioned fire-place ventilation, while it affords the additional feature of keeping all the atmosphere in any given room in uninterrupted circulation, renewing the air continually from above downward, resulting practically in an even temperature from end to end.

It may also, if necessary to meet any special emergency, be converted into a close stove or portable warm air furnace. It is neat, cheerful and attractive; it is economical in consumption of fuel, burning hard or soft coal, coke, or wood, and has received the emphatic commendation of the scientific, religious and popular press, as well as receiving the highest centennial award.

Business Changes.

DRUGS.

New York City.—H. Schweitzer has given a mortgage for $100.

Tuskegee, Ala.—Boyd & Alexander have changed style to Alexander & Co.

Peoria, Ill.—H. Albrecht & Co. have dissolved.

Mona, Iowa.—W. F. Cobb & Co. have sold out.

Boston, Mass.—A. A. Reeve has given a mortgage on his stock for an additional $1000.

Cambridgeport.—Chas. A. Raymond has sold out.

Chelsea.—G. W. Gale has done the same.

Lowell.—C. I. Hood & Co. have dissolved, and Hood is alone.

Springfield.—E. W. Gates has given a mortgage on his stock for $2,000.

Detroit, Mich.—D. R. Bogue & Co. have done the same for $400.

New Baltimore.—M. W. Beecher has changed style to Schaars & Beecher.

Wyandotte.—J. S. Bennett & Co. have dissolved.

Beaver Falls, Penn.—James H. Cox has sold out to Holmes & McDonald.

H. S. McGown has sold out to W. C. Shurlock.

Conneautville.—H. Wilcox has been closed out by the sheriff.

Philadelphia, Pa.—C. H. Lambert is advertising to close out.

Thompsontown.—P. L. Greenleaf is dead.

Providence, R. I.—Gooduon & Carpenter have given a mortgage for $300.

Henderson, Tenn.—Hearon & Co. have dissolved, and Hearon, Davis & Co. continue.

Bradford, Can.—Joseph Deacon is closing out.

OILS.

Hartford, Conn.—Western Oil Co. have dissolved, and George B. Dewey continues.

Chicago, Ill.—Foster, Walker & Co, have dissolved, and Foster, Vilas & Co. continue.

Montreal, Can.—McDougall, Logie & Co., have admitted five new partners; style unchanged.

SOAPS.

Pittsburgh, Pa.—B. C. & J. H. Sawyer—An application has been made to force them into bankruptcy.

PAINTS.

Oswego, N. Y.—Charles Pickert has made an assignment.

Plymouth, Mass.—John T. Holmes has gone out of business.

VARNISH.

Boston, Mass.—Joseph L. Burbank has given a mortgage for $3000.

CHEMICALS.

New York City.—Henry M. Harding has been succeeded by W. Graeve.

GLUE.

Berlin, Can.—Fischer & Son have been attached.

VITRIOL.

Troy, N. Y.—Vaughn & Laton have dissolved, and Bradford C. Vaughn continues.

SPECIAL NOTICES.

BRUSHES.

BRADLEY & SMITH, 251 Pearl Street.

SURGICAL INSTRUMENTS.

E. HERNSTEIN, 54 Chatham Street.

IMPORTATIONS FOR THE WEEK.

All parties desiring their names published in the Imports, will oblige by ending memorandom of goods to this office.

ACID OXALIC—10 cks, 6497 lbs, E Hill, per Dunrobin, Manchester.
" ROSOLIC—10 cks, 1120 lbs, J P Barnett, per City of Berlin, Rotterdam.
ALIZARINE—10 cks, J O'Rourke, per Main, Bremen.
" 61 cks, 23662 lbs, Wm Pickhardt & K, per Frisia, Hamburg.
ALOES—61 cs, Bartram Bros, per Curacao, Curacao.
ALUM—150 cs, 48600 lbs, per Mozart, Bremen.
" CAKE—30 cks, 29009 lbs, per State of Virginia, Glasgow.
AMMONIA MURI—5 cks, per Cornwall, Bristol.
" " 5 cks, per Cornwall, Bristol.
" SULPH—12 cks, 23050 lbs, W F Jordan, per Hindoo, Hull.
ANILINE COLORS—3 cs, 300 lbs, per Main, Bremen.
" " 2 cs, 50 lbs, per Pommerania, Hamburg.
" " 6 cs, 400 lbs, per Wieland, Hamburg.
" " 12 cs, 600 lbs, per Wieland, Hamburg.
" " 8 cs, 800 lbs, per Oder, Bremen.
" " 16 cs, 780 lbs, per Labrador, Havre.
" " 6 cs, 300 lbs, Lutz & Movius, per Frisia, Hamburg.
" " 1 cs, 147 lbs, per Holland, London.
" " 12 cs, 580 lbs, Lutz & Movius, per Frisia, Hamburg.
" " 6 cs, 350 lbs, Lutz & Movius, per Frisia, Hamburg.

Drug, Chemical and Pharmaceutical Notes.

EDITED BY N. C. WHITE.

THE CONSTITUENTS OF BALSAM OF TOLU.

It has long been a disputed point whether balsam of Tolu contains only cinnamic acid, or a mixture of this with benzoic acid. The presence of the latter had been denied by Fremy, and although Deville afterwards obtained benzoic acid from the balsam. yet, according to Kopp, this did not pre-exist therein, but was produced during the process of extraction. The latest researches of Carles likewise seem to prove the absence of benzoic acid.

The question has been again taken by E. Busse, who attributes the conflicting results to the fact that the various investigators employed methods which caused chemical changes in the pre-existing constituents. He employed the method pursued by Kraut in his examination of balsam of Peru, by which such decompositions are avoided as much as possible.

One kilogramme of strongly resinified balsam of Tolu was dissolved in 2 litres (about 68 fl. ℥) of either, the solution filtered from the trifling residue, and shaken for some time with 2 litres of soda-solution, containing 100 gm. anhydrous soda. The decanted ether was repeatedly washed with fresh soda-solution and finally with water until all alkalinity has disappeared. The clear ethereal liquid was deprived of its ether by distillation in the water-bath when it left behind 85 gm. of a neutral liquid, which was subjected to fractional distillation. During this process three separate portions distilled over, part at near 200 deg., another at 250 to 300 deg., and most at over 320 deg. C., which latter separated, on standing, a crystalline mass, exhibiting, after purification, the melting point of cinnamic acid. In order to remove this product, which had probably been formed by the action of heat and water, the several distillates were once more dissolved in ether, deprived of acid by shaking with dilute soda-solution, washed, and after removal of the ether, dehydrated with calcium chloride. Each product was then again rectified and immediately analyzed.

The first distillation yielded figures which led to no certain formula. But the reaction seemed to indicate that it consisted of impure benzyl alcohol.

The second distillate, which boiled at 300° C, yielded the formula $C_{14} H_{12} O_2$ corresponding to benzoate of benzylic ether, and after treatment with potassa, and addition of sulphuric acid, yielded an acid, having the melting point 121° C., and proving to be undoubtedly *benzoic acid.*

The third distillate, boiling at over 320°, yielded the formula $C_{16} H_{14} O_2$, (cinnamate of benzylic ether), and yielded an acid, melting at 133° C., which was therefore *cinnamic acid.*

These results prove that balsam of tolu contains the same constituents as balsam of Peru, but in smaller quantities and in different proportions—cinnamic acid predominating in the former, in the latter benzoic acid.

The alkaline solution was deprived of resin, and divided into two portions, one of which was treated with milk of lime, and the resulting calcium-salt, after recrystallization, decomposed. It yielded cinnamic acid. The liquid filtered from the difficultly soluble calcium cinnamate yielded a new salt, the acid of which was found to be benzoic acid. The other portion was dissolved in alcohol, and converted by hydrochloric acid gas into the corresponding ethylic ether.

Balsam of tolu hence contains cinnamic and benzoic acids, neutral benzoate and cinnamate of benzylic ether, and a peculiar resin, which, however, requires further investigation.—From *Ber. d. d. chem. Ges.*, 1876, 830.

PREPARATIONS OF XANTHIUM SPINOSUM.

By M. Guichard.

This new medicinal agent, so much praised for its effects in hydrophobia has not, as yet, been studied from a pharmaceutical or chemical point of view; I will try, therefore, to fill the gap by bringing these my first results before you.

The usual method of employing it consists in administering the finely pulverized plant several times a day in ten grain doses; but it is quite probable that advantages might be derived from the use of either an alcoholic or watery extract.

The plant occurs under the form of stems, bearing leaves and numerous thorns, The thought was suggested of studying the hulled plant, and the plant in its natural state; and of noting the effects of each separately, as it is possible that all the parts are not possessed of equal virtues.

The yield in the form of extract is very variable: five drachms of the hulled leaves yield one drachm and a quarter of a greenish extract containing much chlorophydes; four ounces and a half of the unprepared plant treated in a similar manner furnished an extract equally green but much less in quantity; the yield in this case being seven and a half per cent, while in the former it was twenty-five per cent.

I prepared these extracts by coarsely pulverizing the plant and treating it by percolation after twelve hours maceration, first with alcohol at 90 deg., and then with alcohol at 60 deg. An infusion was made with four ounces of the unprepared plant, and evaporated on the water bath; the yield in this case being thirty-nine per cent. The alcoholic extracts are very bitter; the watery ones are scarcely so; and with all probability the alcoholic extracts are the most active.

The alcoholic extract redissolved in water is precipitated by iodated potassium iodide and is precipitated by cadmic potassium iodade. The alkalies precipitate the iron and the alumina of the plant. By drying the extract with calcined magnesia, then treating it with ether, we obtain an extract which, dissolved in water slightly acidulated with hydrochloric acid, gives an abundant kermes precipitate with iodated potassium iodide, and with cadmic potassium iodide a dirty grey precipitate is thrown down, which separates in the form of curds from the solution; ammonia slightly precipitates this solution.

By evaporating the above aqueous solution on the object glass of the microscope, crystals of various forms are obtained, needles grouped in crosses or in three branched stars, granular matter and green coloring substance, are all distinguishable; the hydrochloric solution gives large square or rectangular tables, as well as needles.

The liquid precipitated by ammonia contains a great number of amorphus particles and bundles of fine needles.

The watery extract treated in the same way gave no result; therefore the alcoholic extract is to be preferred; but these experiments seem to show the existence of an alkaloid which I hope to isolate when I get more material to work upon.—*Repertoire de Pharmacie et Journal de Chemie Medicale*, 1876.

THE AMERICAN PHARMACEUTICAL ASSOCIATION.

The following was crowded out of our last week's issue:

We have received an abstract of the proceedings of this Society at their late annual meeting. The topics discussed were of unusual interest, and the papers read, which will be published in the forthcoming report, will be of great value. Among the topics discussed was the revision of the U. S. Pharmacopœa, and a committee was appointed.

It is to be hoped that this matter of revision will now be accomplished.

The Association also accepted the report of Dr. F. Hoffman on "Metrical Weights and Measures," and recommend that it be adopted; and that our Government shall fix a time after which it shall be the legal standard of the country.

The following gentlemen are the officers elected for the ensuing year:

President—Chas. Bullock, of Philadelphia.

Vice-Presidents—S. A. D. Sheppard, Boston; George J. Luhn, Charleston, S. C.; J. D. Wells, Cincinnati.

Treasurer—C. A. Tufts, Dover, New Hampshire.

Permanent Secretary—J. M. Maisch, Philadelphia.

Reporter on Pharmacy—C. Lewis Diehl, Louisville, Ky.

Local Secretary.—Henry J. Rose, Toronto, Canada.

Executive Committee.—Wm. Saunders, London, Ont.; W. H. Wickham, J. F. Judge, N. G. Bartlett, Chas. F. Meyer.

Committee on Paper Queries.—Wm. H. McIntyre, Philadelphia; Louis J. Dohme, Joseph L. Lemberger.

Business Committee.—Joseph Roberts, Baltimore, Md.; H. D. Welcome, Chas. Rice.

POISONOUS COSMETICS AND HAIR DYES

It seems hardly possible that people will continue the use of preparations like the following after knowing their composition. Those containing lead, mercury and zinc are virulent poisons, and should not be tolerated for a moment. The hair dyes depend for their coloring properties upon the action of lead upon sulphur, forming a black sulphide of lead, which forms upon the air and changes its color for the time being. Prof. Merrick very justly says of them: "There can be no doubt whatever but the use of these nasty preparations is attended with much danger from the absorption of lead into the pores of the skin." again, it is worthy of note that these metallic poisons are labeled and advertised as "purely vegetable." The cost is but a few cents, and they are usually sold for from 75 cents to $1.50. Below will be found the grains of lead to the fluid ounces; Ayer's Hair Vigor, 2 38; Ring's Ambrosia. 5.09; Hall's Renewer 5.05; Phalon's Vitalia, 13 89; Martha Washington Restorer, 9 20; Singer's Restorer, 11.30; Gray's Restorer, 3.35; Hagan's Magnolia Balm, 66 50 oxide of zinc; Oriental Cream, 31.50 grains sub chloride of mercury; Perry's Moth and Freckle Lotion contains mercury, lead and zinc; Enamel for the Complexion, oxide of zinc.—*Minneapolis Tribune.*

COLDS IN THE HEAD.

It would seem as if the cure for those worst of all small nuisances, colds in the head, which Dr. Ferrier, of King's College, suggested in the *Lancet*, might prove to be a remedy of very great value. It is a snuff—a white powder—composed of the following ingredients: Hydrochlorate of morphia, two grains; acacia powder, two drachms, trisnitrate of bismuth, six drachms—the whole making up a quantity of powder of which from one quarter to one-half may be safely taken, if necessary, in the course of twenty four hours. Dr. Ferrier says that with this snuff he has twice cured himself of very violent colds, once, indeed, by taking trisnitrate of bismuth alone, which is a very powerful remedy for catarrh of the mucous membrane, and is the most important ingredient in this snuff. Dr. Ferrier mentions two other persons who were cured of violent colds by the same snuff, and to these instances we may add that of the present writer, who having a very violent cold coming on with the sensation of weight in the temples and the usual disagreeable feeling in the throat, as well as ordinary catarrh, made trial of Dr. Ferrier's remedy one evening, and got up on the following morning completely free from cold, which has not since recurred. The snuff, instead of increasing the tendency to sneeze, almost immediately begins to diminish it.

PICRIC ACID.

Is prepared from carbolic acid by carefully introducing, in small quantities at a time, a stream of nitric acid into pure carbolic acid, or into previously formed carbolic and sulphuric acids. Other processes were formerly in use; but the above, which is the subject of the query, is almost exclusively followed at present, owing to the remarkable purity of the product. Commercial picric acid is said to be often adulterated with foreign substances, such as sulphate of soda, borax, oxalic acid, etc. The admixture is easily detected by treating the product with benzol, which dissolves picric acid, while most of the foreign bodies remain insoluble. It may not be useless to add that picric acid and its combinations are liable to explode when exposed to sudden heat; the picrate of potassa may be exploded by percussion alone.

SYRUP OF IPECACUANHA.

According to the following formula a clear syrup can be made, which will keep well:

Take of

Ipecacuanha, coarsely powdered (30-40 meshes	1 tr. oz.
Alcohol	1 fl. "
Water	3 " ozs.

Introduce into a flask, digest in water bath 48 hours, allow to cool, bring on a filter and allow the liquid to pass. Pour on the filter a mixture of

Alcohol	½ fl. oz.
Water	1½ " "

and follow with water to make the liquid measure 8 fluid ounces,

Add to this:

Best loaf sugar	12½ tr. ozs.
Boil and strain to	16 fl. "

A. F. W. Neynaber.

SWEET CIDER.

The following is a simple and efficient method of preserving cider: When it has reached the state most desirable to the taste, add two tumblerfuls of grated horse-radish to each barrel, and shake well. This arrests further fermentation. After a few weeks, decant the clear liquid and bung up closely in clean casks.

WADSWORTH, MARTINEZ & LONGMAN'S
PURE PAINTS,
PREPARED
FOR
IMMEDIATE USE.

We furnish these Paints to the Dealer on favorable terms, and authorize their sale subject to the satisfaction of all buyers. We agree to repaint any house with English White Lead, or any other White Lead, if our Paints do not prove perfectly satisfactory. Evidence of the value of these Paints, is indicated in the increasing demand for them. Sample cards, &c., sent on application.

Wadsworth, Martinez & Longman,
Manufacturers and Importers, White Lead, Paints, Colors, Oils, &c.
207 PEARL ST. NEW YORK.

WOOD PRESERVATIVES.

According to observations made on a railroad in Germany, the proportion of renewals was, with oak sleepers (not treated) after 12 years of service, 74·48 per cent; with oak sleepers, treated with chloride of zinc, after 7 years, 3·29 per cent; with oak sleepers, impregnated with creosote oil, after 6 years, 0·09 per cent; with pine sleepers, impregnated with chloride of zinc, after 7 years of service, 4·46 per cent. The practice of this railroad, since the year 1870, has been to employ only oak for sleepers, which are impregnated either with chloride of zinc or with creosote oil.

ABSORPTIVE POWER OF MILK.

Attention has been called in the daily papers to a practice prevalent in some parts of the country, which appears to illustrate the power possessed by milk of absorbing atmospheric impurities. It is that of placing a saucer of new milk in a larder, to preserve meat or game from taint. It is said that not only does it answer that purpose, but that the milk, after a few hours, becomes so bad that no animal will touch it.

GLYCERINE-GELATINE FOR PROTECTING PRESERVED FRUIT.

A composition of glycerine and gelatine, similar to that employed for printers' rollers, but of purer materials, is recommended for protecting preserved fruit, &c., from the action of the air and fermenting agencies. A thin layer of the fused mixture is simply poured upon the fruit and allowed to harden. It can be readily removed, and may be used again for the same purpose, by melting it on a water bath.

AYER'S CHERRY PECTORAL.

The following is said to be the formula, or something nearly similar:

Syrup of wild cherry.....	6	drachms.
" " squills.....	3	"
Tincture of bloodroot....	2	"
Sweet spirit of nitre.....	2	"
Antimonial wine.....	3	"
Wine of ipecac.....	3	"
Simple syrup.....	12	"
Acetate of morphia.....	2	grains.
Oil of bitter almonds.....	2	drops.
Dissolve in alcohol.....	1	drachm.

EXTRACT OF BEEF.

Bouchardt warns against the incautious use of this extract, under the mistaken notion that an increase of dose will be followed by a corresponding increase of benefit. Both he and Stuart Cooper have shown that large doses of the extract are quite injurious. He further asserts that it cannot at all be compared to meat-juice (expressed in the cold from raw meat) as a strength giver.—*Bull Therap.*

JANEWAY'S PILLS.

These pills are a favorite prescription of E. G. Janeway, M.D., Professor at the Bellevue Hospital Med. College, N. Y., and are composed as follows:

℞ Ext. belladonnæ
Ext. nucis vomicæ āā..... gr. iij.
Res. podophylli..... gr. vj.
Aloes socotr..... gr. xij.
M. Fiant pilulæ xij.

They are an excellent laxative or cathartic, and do not gripe.

Importations, 1876.

The following is a complete list of the imports of Oils, Paints and Drugs entered at the ports of New York and Boston for the present year up to date (in cases where weight cannot be correctly stated the number of packages alone will be given.)

NEW YORK, Oct 4, 1876.

ROBERT B. BROWN & CO.

MANUFACTURERS OF

BRILLIANT

CASTOR OIL,

ST. LOUIS.

DRUG MARKET.

NEW YORK, Tuesday Ev'g, Oct. 17.

We have still to note a fair demand for goods, though the inquiry is not quite so large as at our last report. The orders coming to hand are still small, and the most of the business is being done in this way, large lots not being taken very freely. Dealers are, as a rule, still confident of an increased trade ere long, though some think that there will only be a moderate amount during the present season. Prices continue steady in tone, with some ruling firm, owing to small stock.

Opium is quiet, but shows an upward tendency, owing to advices of a higher market in Smyrna. The latest reports give the market as firm at 185 piastres and the stock on hand as having been reduced to 600 cases. This makes holders here rather firmer in their views, and there have been sales of 30 cases at $5 25 gold in bond, closing with holders quoting $5 50 in bond, and $6 50 gold, duty paid. Jobbing parcels are also firmer and in fair request, with $7 15 generally asked, though there are some parcels still offering at a less figure. Powdered is quoted at $9 12½.

Morphine is in steady demand, with manufacturers quoting $4 75. C T W & Co, is to be had at $4 65.

Quinine is in good request for jobbing lots and rules steady in prices, holders asking $2 45@2 50, with some parties quoting outside lots at $2 60.

Quicksilver is slow of sale and prices rule nominally unchanged at 50c gold, with some small parcels being taken for which 51c gold is demanded. An outside lot of 80 flasks was disposed of at a private price.

Mercurials are weak with but a trifling business doing. Corrosive sublimate 60c, calomel 70c, red precipitate 80c, white do. 90c.

Balsam copaiba is in fair jobbing demand, and parcels are being taken as wanted at 43½@44c, at which figures about 3000 lbs in lots have been sold.

Camphor is in steady demand, and rules unchaged, holders still quoting 26¾c@27c.

Shellac has been in active demand and a large part of the late purchases, which were chiefly of a speculative character, are now being taken by the jobbing demand, which is now quite active. The stock is not over large, and holders are firm as to price, and quote D C 40c, V S O 34c, Diamond I 32c, Diamond H 30c, all gold, and Garnet 29c cy. We note sales of 15 cs Diamond S spot at 31c cy.; 15 cs D C spot at 40c gold, and 25 cs V S O to arrive at 30c gold.

Ginseng has been taken quite freely for export, and we hear of parcels in all about 10,000 lbs being taken at a private price. At the close prices are firm with some parties quoting $1 50.

Castor oil is in active demand and rules firmer in tone. Sales have been made of fair parcels, and holders are now asking 12¾@13¼c, as to brand.

Grape sugar continues in active demand and prices rule steady in tone, with small sales of spot lots making. To arrive there have been sales of 1200 cases, and 600 cases at 5¾@6c, with dealers now quoting those figures for future delivery, and 6¼@6½c for spot parcels. The stock of old is entirely exhausted and no new has been received, and no lower prices are looked for until the new crop comes to hand.

Glucose is in fair demand and rules about steady at 6¾@7c for spot parcels. To arrive 6½c is demanded with sales of 75 casks at this figure.

Gum Arabic is in fair demand and prices are rather steadier. There have been some parcels offering in the market, but these are now held for a higher figure and an advance of about ten per cent is asked.

Licorice paste is in fair demand, and prices rule steady. Stick is selling freely, some dealers being sold ahead and not able to fill orders. Mellor and Rittenhouse are now offering at 27@30c.

Arsenic rules firm in tone, with but little to be had; dealers are quoting 3⅞@4c both on spot or to arrive. Red is in fair request and rules steady at 12c.

Angostura bark is selling in small parcels as wanted at 25@35.

Aconite root is in small jobbing demand and rules steady in price at 18@20c.

Rhubarb sells steadily as wanted, and is unchanged in price, holders still quoting 85c@$1 50. A parcel of 15 chests was taken on private terms.

Saffron is held a shade higher for American, and is now quoted at 20@25c.

Aniseed are selling fairly and rule steady at 11@15c, as to quality.

Coriander are rather steady, with jobbing sales making at 7½@9c.

Mustard seed still rule scarce and firm for yellow, and holders are quoting 9½@10c. The supply is limited and but small parcels coming forward. Brown is quiet and easy.

Jaborandi is in light demand but there is a jobbing trade doing which is being supplied at 35.

Chloral hydrate is in fair jobbing demand and rules steady at $1 65@1 80 as to brand.

Carbolic acid is selling fairly and rules steady in price at 65c.

Salicylic acid is in good demand and fair sales are making at $3 50@4 according to quantity.

Castile soap is in good request, and fair sales are making, holders asking 8⅝c for mottled, and 16c for Conti white.

Caraway seed are in good request, and prices are steady at 11½c@12c, with sales in lots of 60 bags.

Borax is rather firmer, though still quoted at 11@11¼c for city and 9¾@10½c for California.

The following letter has been received by a leading house in this city, which speaks for itself. It would seem to indicate that the supply is giving out:

OCTOBER 5, 1876.

Yours dated September 26th has been duly received. Will sell you concentrated crude borax at 6½ cents per pound, U. S. gold coin, cash on presentation of bill of lading at any bank that you will appoint.

Of course this is what we can do at present, should your order come in without delay, otherwise we do not hold ourselves to this price, as it is liable to change, most of the fields being exhausted, and only a small quantity of borax produced.

Yours respectfully,

E. K. STEVENOT & CO.

Spices have been in good steady demand during the past week and prices are steady. Cassia is quoted at 18c@21c gold as to quality; saigon 35c@36c gold; cloves are rather easier though still held at 35@36½c gold; stems steady at 14@14½c gold; mace is jobbing fairly as wanted at 90@95c gold; grinding quality 85c gold; pepper has sold freely and is steady at 13½@14c gold; white 22c gold; nutmegs selling in small parcels at 85@87½c gold; pimento is in good request and rules steady at 12½@13c gold; grinding 12@12½c gold.

Essential oils have been in fair jobbing demand during the week and prices are generally steady.

Anise coming to hand and rules steady in price with holders asking $1 50 for jobbing lots. There was a sale of 25 cases but we did not learn price.

Bergamot is selling rather slowly and is a shade easier in tone; Sanderson's is now offering at $3 75 gold with small parcels being taken at this figure, N A & Co, is in fair request at $3 70 gold.

Cassia is in fair demand, but with a good stock on hand and fair parcels coming forward, holders are easy as to price and quote 85c.

Lemon is in rather better request, and prices rule steady at 2@$2 20 gold, according to brand, though we hear that for a round lot these figures can be shaded.

Clove is in small jobbing demand, and rules unchanged in price.

Pepperment is not so active as at our last report, though there is a fair trade still doing. Pure oil is offering at $2 50, but this is higher than buyers want to pay, and a round lot might be had for less. Case oil is being taken to a fair extent for export, and is held at about $3 25 with some parties asking $3 50.

Sassafras is in jobbing request, and rules unchanged at 47@48c.

Wintergreen is selling in small lots as wanted, at $2 50.

Powdered Ext. of Licorice,
Licorice Lozenges,
5 and 10 lb. boxes.
M. & R. Extract of Licorice,
6 to 16 sticks to a pound.
For sale by CHAS. H. RUTHERFORD,
No. 9 Gold street, New York.

FINE TOILET SOAPS.

The best value in TOILET SOAPS is found in

Robinson's Indexical Large Oval Tablets.

Honey, Glycerine, White Glycerine, Brown Windsor, Turtle Oil, Oatmeal Glycerine, Palm Oil, White Windsor, Alpine, Sunflower, Poncine, Bay Leaf, Almond Meal, Rice Flour, Tar, Sand, Pumice, &c.

ALMOND MEAL SOAP.—Registered July 27, 1875. Rich in Sweet Almond Meal, Albumen, Glycerine, Benzoin and Ottos. Its fine emollient properties are unexcelled by any Toilet Soap in use.

RICE FLOUR SOAP.—Registered July 13, 1875. An extra fine white Toilet Soap, with abundant, agreeable and lasting perfume.

OATMEAL GLYCERINE SOAP.—Registered June 8, 1875. Recommended for use in all extremes of weather. It is especially adapted to the tender skins of young children. Made exceedingly mild, it is far preferable to the best Castile.

CAUTION.

The only genuine Oatmeal Soap is ROBINSON'S OATMEAL GLYCERINE. It is the cheapest fine Toilet Soap in the world, and a perfect winter soap. Ask for ROBINSON'S OATMEAL SOAP.

The above Soaps are made only by the

INDEXICAL SOAP CO.,

J. P. LAROZE'S SYRUPS.

Are Elegant, Palatable Preparations of Various Medicaments in Common Use.

They are highly recommended by the Medical Profession in France, and adopted by the Public at Large.

LAROZE'S SYRUP of Bitter Oranges, an Anti-Nervous Tonic. Recommended by Medical Men as a means of regulating the functions of the stomach and intestines, and as a powerful auxiliary of preparations of Iron and of the Iodide and Bromide of Potassium.

SEDATIVE SYRUP of Bitter Oranges and of Bromide of Potassium (Chemically pure). A sure sedative in diseases of the heart and of the respiratory and digestive organs, in neuralgia, and in sleeplessness of children during dentition.

DEPURATIVE SYRUP of Bitter Orange-Peel and of Iodide of Potassium. An efficacious medicament in strumous, tubercular, cancerous, and rheumatic affections, and in scrofulous swelling of the knee, tumors of the breast, and secondary and tertiary manifestations.

CHALYBEATE SYRUP of Bitter Orange-Peel, Quassia, Amara, and Proto-Iodide of Iron. The liquid form is the best for administering Iron in green-sickness, leucorrhœa, disorders of menstruation, anæmia, rickets, etc.

New York: E Fougera & Co. Quebec: Giroux & Co. Montreal: Devins Belton.

Sold in Paris by J.-P. Laroze et Co., 2, *rue des Lions, Saint-Paul.*

WINCHELL'S PATENT OIL TANK.

Patented September 26, 1871.

Is constructed of galvanized iron and japanned. Has a wood bottom underneath the metal bottom. A pump, which may be removed to transfer oil from a barrel to the tank without loss. A drip pan, which will be found a clean and safe receptacle for measures and funnels. Any overflow in filling small cans runs into the reservoir below. The gauge sticks marks accurately the quantity contained in the tank. A cover over all prevents the accumulation of dust, evaporation, and unpleasant odor of oil, and is secure from fire.

The tanks may be locked if desired.

Retailers and consumers of oil should have one as a matter of safety, convenience and economy.

EVERY TANK IS WARRANTED.

SIZES: 50, 75, 100, 150, 200, 250 GALLONS.
